Some really nice looking and challenging maps. They aren't the hardest in the game but they provide a good challenge.

However Azure 2 has a loading problem when you are travelling too fast (which you are supposed to do), it cause graphical glitches and can sometimes invisible wall you.

Whether it's worth \$2 is up to you, personally I think it was to me. (the base game was ridiculously good value). The bhop maps in this pack are lacking imo, i would like to see maps longer than 20 seconds. Ocean in particular felt rushed or maybe you could even say underdeveloped. Azure was pretty standard, while pleasing to look at it could of been better.

However as far as the slide and fly maps go, no complaints. I especially enjoy the slide maps, they are great fun and forgotten 2 was a bit of a challenge while offering many, many routing paths. Azure 2 was visually stunning and very fun, didnt offer as much in terms of routing as forgotten 2 did but still great.

The two slide maps offered a great vareity of routes and options while being pleasing to look at, no complaints.. Now I don't necessarily think that these 6 maps were enough for another \$2... but the base game is such a good value as is that I'm more than happy to give the devs a little more.

The maps are pretty fun, though my favorite maps still remain the ones in the base game.
